

Lower West Coast Planning Document

CONTENTS

Planning Document (Volume I)

Executive Summary	i
I. Introduction	
Plan Definition and Purpose	1
Planning Area Description	1
Goals, Directives and Policies	1
Goal	3
Water Supply Plan Guiding Directives and Policies	3
Community and Governmental Relations Guiding Directives and Policies	3
Plan Components	4
Major Factors Influencing the Plan	5
Rainfall Dependency	5
Surface Water Availability	5
Protection of Water Resources and Associated Natural Systems	6
Current and Future Demand	6
Role of the LWC Advisory Committee	6
Outstanding Natural Systems	7
Resource Protection Criteria	8
Wetland Protection Criterion	10
Seawater Intrusion Protection Criterion	10
General Aquifer Protection Criterion	11
Minimum Flows and Levels Concept	11
Minimum Levels - LWC Aquifer Systems	12
Minimum Flows and Levels - LWC Surface Water Systems	13
Ground Water Modeling	14
Base Case Model Runs	14
Alternative Modeling Scenarios	14
	16
II. Modeling Results	19
Base Case Modeling Results	19
Alternative Modeling Scenario Results	19
Scenario 1 - Evaluate reduction of public water supply demands from the shallow aquifers	19
Scenario 2 - Evaluate reduction of agricultural water use by increased irrigation efficiency	20
Scenario 3 - Evaluate increased use of reclaimed water	21
Scenario 4 - Evaluate implementation of proposed long-term modifications of the Big Cypress Basin canal system	22
Scenario 5 - Evaluate combination of Scenarios 1 and 3	23
Scenario 6 - Evaluate combination of Scenarios 1, 2c, and 3	23
Summary of Modeling Results	24
Effectiveness for the Wetland Protection Criterion	47
Effectiveness for the Seawater Intrusion Protection Criterion	47
Effectiveness for the General Aquifer Protection Criterion	50
Discussion of Modeling Results	50
	51

Lower West Coast Planning Document

III. Conclusions and Recommendations	53
Conclusions	53
Allocating Water Resources	53
Recommendations	55
Develop New Sources of Water	55
Use Water More Efficiently	60
Modify Planning and Regulatory Strategies to Protect Water Resources and the Environment	64
Perform Additional Studies of Water Resources and the Environment ..	70
Implementation Strategies	73
IV. Summary	75
Planning Process	75
Implementation of Recommendations	76
Develop New Sources of Water	76
Use Water More Efficiently	78
Modify Planning and Regulatory Strategies to Protect Water Resources and the Environment	79
Perform Additional Studies of Water Resources and the Environment ..	80

Background Document (Volume II)

I. Introduction
II. Water Resources and System Overview
III. Environmental Resources and Needs
IV. Demand Estimates and Projections
V. Water Conservation Measures and Supply Alternatives
VI. Analysis of Water Supply Alternatives
References Cited
Glossary

Appendices (Volume III)

A. Selected Passages from the Florida Statutes and Administrative Codes
B. County Land Use Maps
C. Rainfall Frequency Analysis
D. Ground Water Resources
E. Potable and Wastewater Treatment Facilities
F. Wetlands and Environmentally Sensitive Areas
G. Methodology for Urban and Agricultural Demand Projections
H. Factors Affecting Water Supply
I. Water Conservation and Supply Alternatives
J. Listing of LWC Water Supply Plan Advisory Committee
K. Seawater Intrusion and General Aquifer Protection Criteria Levels Used in Modeling
L. Public, Local, Government & Agency Comments
